TO WHOM IT MAY CONCERN WITH REFERENCE TO THE AJEGUNLE COMMUNITY PROJECT

We are pleased as a school that over two (2) years ago, the Ajegunle community project has contributed immensely to the tone of the school.

It all started with the launching of the project – Antiviolence Club. This project introduced student to several issues among which are:

1. Girl Child abuse and discrimination in the society.
2. Gender Based violence and discrimination.
3. Female Genital mutilation
4. Peer Pressure
5. Leadership

The school is particularly elated by the care and the love with which they go about with their programmes, both teachers and students are properly entertained with gifts such as vest, face caps, transport fare, food and drinks. Definitely these sorts of gesture would encourage parents and guidances alike to continually release their children and wards to such activities.

The club has:

1. Underscored the benefits of good sexual behaviour in both the boy and the girl child.
2. It has laid the framework for future development of their personality especially in terms of knowing their rights, obligations and valued freedoms.

On the whole we recommend that they are given the necessary support to continue this laudable project.
